Work History

VIENGINE DIGITAL SOLUTIONS | JUNE 2023 — PRESENT | REMOTE

Full Stack Developer

Building responsive web applications and interactive 3D solutions for real estate companies, with a focus on performance and features that set products apart from competitors.

- Built an AI assistant that navigates the site itself — opening pages, launching virtual tours and video calls with sales
- Built a Google Maps-style route and travel-time system over static 3D renders, easily reusable across new projects
- Cut 3D scene load times via phased frame loading, letting users interact almost instantly even on slow connections
- Migrated infrastructure from Apache2 to Nginx, improving performance across projects
- Built Next.js websites with Python backends (FastAPI), plus CI/CD pipelines and server/database/mail (SMTP) management

FREELANCE | 2022 — JUNE 2023 | REMOTE

Full Stack Developer

Delivered custom web solutions for a diverse client base, specializing in e-commerce stores and high-converting landing pages, alongside automation tools and bots.

- Designed and built e-commerce stores with Stripe payment integration, covering everything from storefront to checkout flow
- Developed responsive, high-performance landing pages with React and Next.js
- Created 30+ automation solutions, bots, and custom Python software to streamline client business workflows
- Built tailored data processing applications for varied client needs
